An Australian  
African Partnership

**Austral African  
Survey Group**

## ABOUT US

Austral African Survey Group (AASG) is a partnership between McGregor Surveys and MineDev Surveys who have offices in Perth, Western Australia and in Accra, Ghana (West Africa) that deliver high quality surveying services to clients that have projects in Africa.

Our joint venture is a unique combination of two surveying companies that complement each other by providing experienced African project surveyors that have been trained by Australian project surveyors. Your project will have our site based African surveyors on the ground backed up with the support of Western Australian surveyors who have played a part in training our African surveyors.

## HSEQ

### Health and Safety

We are committed to delivering professional surveying services in a manner that will not cause employees, contractors or the general public to be at any risk. In support of these commitments, we implement a zero harm work practice, leaving positive legacies upon communities in which we operate.

### Environmental

Our joint venture is committed to the principles of sustainable development and we recognise our responsibility to make a contribution to minimise the impact on the environment.

On your project we will work with you to put a management plan together based on your requirements to deliver all surveying objectives on your project.

By passing on our knowledge with our on “the job” training, combined with ongoing practical assessments, we have produced highly competent African project surveyors.

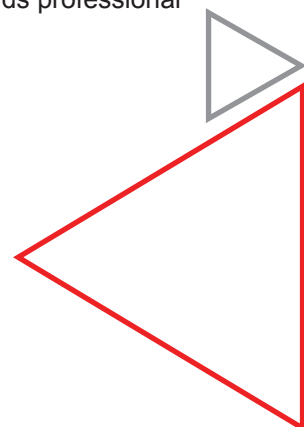

## We aim to always exceed best practice

### Quality

We strive to continually improve our quality management systems by ongoing internal audits, improving the delivery of service and customer satisfaction by associating with institutions which promotes and upholds professional ethics.

MINE SURVEYORS

# CAPABILITIES

## PROJECTS / OPERATIONS SURVEYING

Our organisation will offer all surveying solutions which will include the phases of exploration, construction and operations providing;

- Setup of survey control network for project construction and operations
- Topographical surveys for contours and features required for project designs
- Engineering surveying set outs and checks for construction
- UAV surveys with photos and digital terrain models to the advantage of the project and operations
- Final as-builts and close out for exploration and construction infrastructure
- Training local surveyors that are employed by your organisation.
- Mine surveying services to kick start operations

## MANAGEMENT

Our management team will meet with the client to discuss the surveying scope of work and to customise the systems, procedures and management plans to meet the individual project requirements throughout the operations.

We would provide,

- The initial setup of all necessary systems, standard operating procedures and work to an allocated budget to ensure all scope of work is completed using the most cost-effective methods, and
- Backup support for our teams on site from the Perth office.

## OVERSEAS STAFF

Directors of AASG have employed skilled mining professionals in Australia and overseas for the past 20 years. We understand how skill shortages have affected the mining industry in Australia and the difficulties companies face when sourcing professional staff from overseas.

AASG is able to sponsor overseas candidates, to our client's requirements and specifications. Our skilled employees are qualified, competent, efficient, trained to work safely and to deliver quality services to all clients.

We can provide your company with overseas skilled professionals on a permanent, contract or labour hire basis for construction projects and operations. We can recruit the following professionals, but are not limited to:

### *White Collar*

- Mining & Engineering Surveyors
- Mining Engineers
- Civil & Project Engineers
- Geologist
- Schedulers & Planners
- Contract and Quantity Engineers

### *Blue Collar*

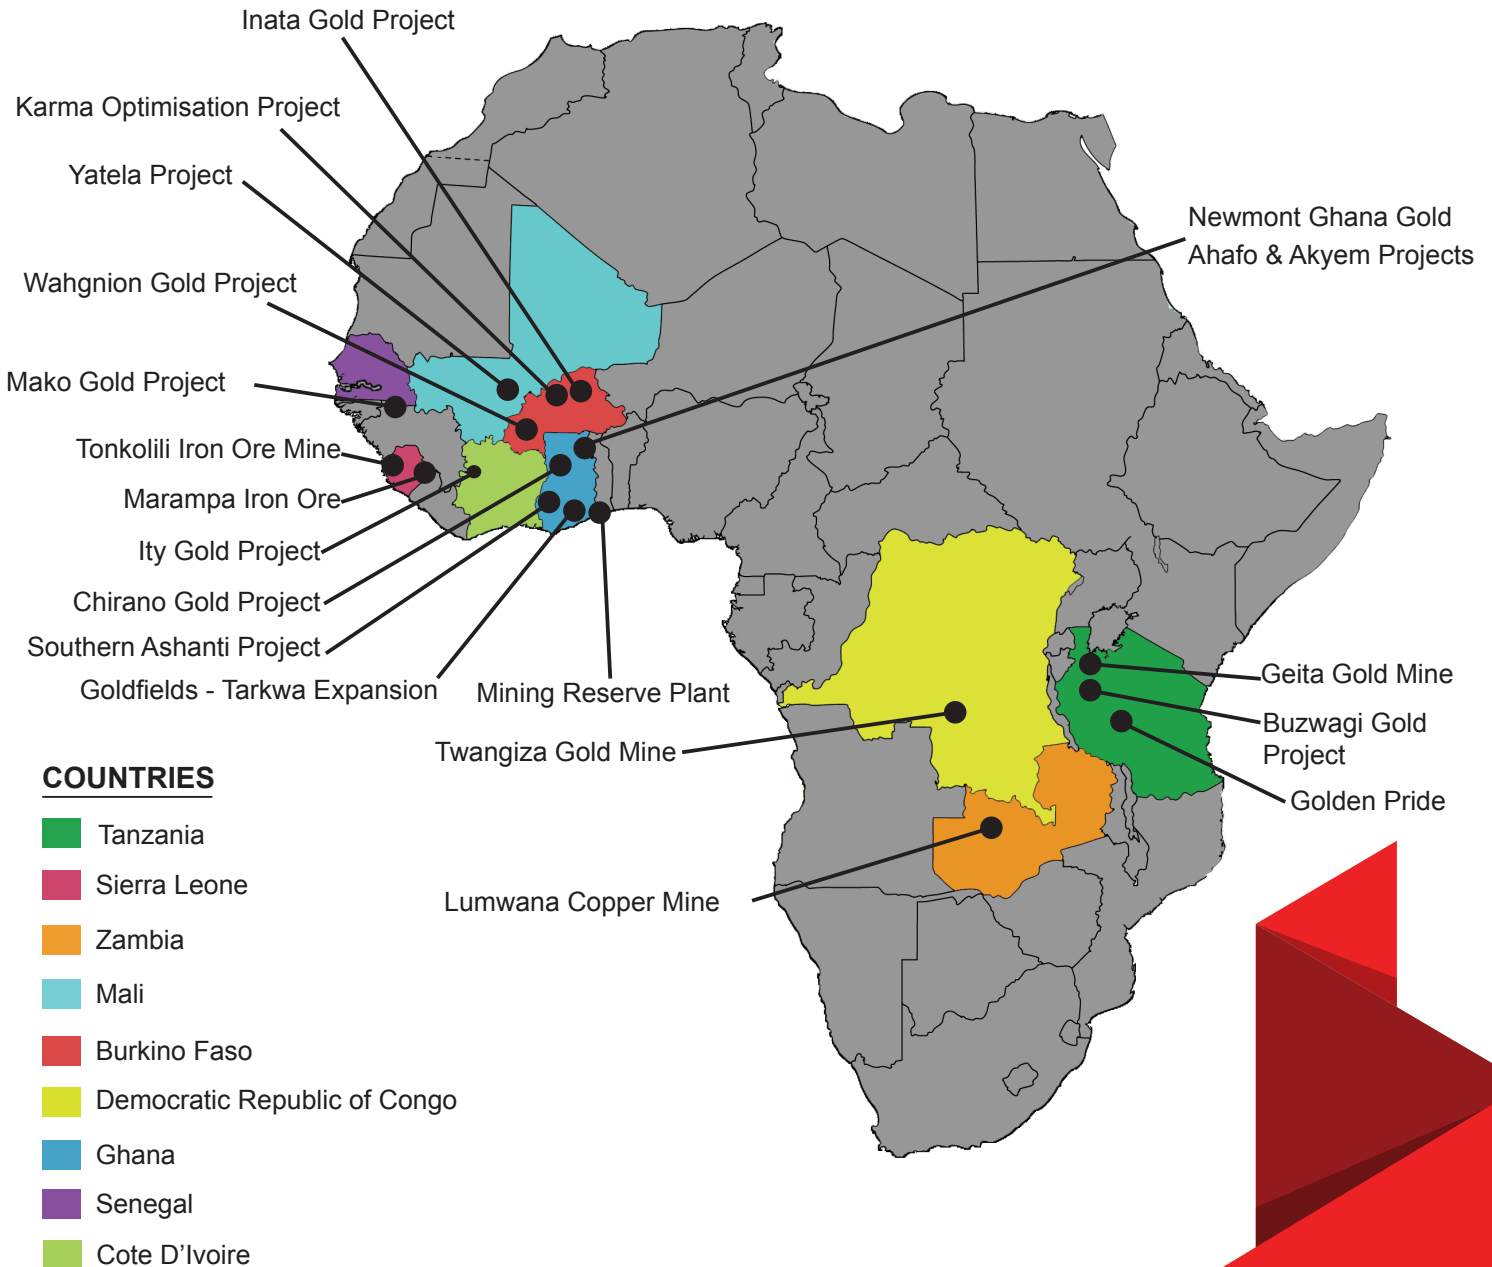

- HD Fitters
- Drill Mechanics
- Drillers
- Boilermakers
- Welders
