An Australian
African Partnership

**Austral African
Survey Group**

ABOUT US

Austral African Survey Group is a partnership between McGregor Surveys and MineDev Surveys who have offices in Perth, Western Australian and in Accra, Ghana (West Africa) that deliver high quality surveying services to clients that have projects located in Africa.

Our joint venture is a unique combination of two surveying companies that complement each other by providing experienced African project surveyors that have been trained by Australian project surveyors. Your project will have our site based African surveyors on the ground backed up with the support of Western Australian surveyors who have played a part in training our African surveyors.

HSEQ

Health and Safety

We are committed to delivering professional surveying services in a manner that will not cause employees, contractors or the general public to be at any risk. In support of these commitments, we implement a zero harm work practice across the board, leaving only positive legacies upon communities in which we operate.

Environmental

Our joint venture is committed to the principles of sustainable development and we recognise our responsibility to make a contribution to minimise the impact on the environment.

On your project we will work with you to put a management plan together based on your requirements to deliver all surveying objectives on your project.

By passing on our knowledge with our on “the job” training, combined with ongoing practical assessments, we have produced highly competent African project surveyors that have gone onto successful careers in their own countries and beyond.

We aim to always exceed best practice

Quality

We strive to continually improve our quality management systems by ongoing internal audits, improving the delivery of service and customer satisfaction by associating with institutions which promotes and upholds professional ethics.

AUSTRALIAN
INSTITUTE OF
MINE SURVEYORS

CAPABILITIES

Our organisation will provide all surveying solutions that will take your company from the exploration phase right through to your operations phase and if requested, provide training to local surveyors that are employed by your organisation.

Initially we will setup all necessary systems, standard operating procedures and work to an allocated budget to ensure all scope of work is completed using the most cost effective methods.

Our project surveyors will produce quality results on the ground, adopting the management systems setup for the project to deliver all requested information.

MANAGEMENT

- Setup all management systems / standard operating procedures / management plans / policies and work instructions.
- Engage all Project Surveyors for the project
- Cost control of budget and provide updated cost forecast to practical completion
- Introduce training program as requested from the client
- Arrange purchasing / leasing of all survey equipment if requested from the client.
- Setup a reporting schedule for submission to client

Adding value to your project

SURVEYING
